Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 June 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Amendment

This office action is in response to the amendments filed on 6/20/07. Claims 1 and 2 have been amended and claim 4 has been added. Claims 1 – 4 are now pending in the current application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 - 4 rejected under 35 U.S.C. 103(a) as being unpatentable over Weiss (US 6,623,006) in view of Loose (EP 1,260,928).

Regarding claims 1 and 4, Weiss provides a gaming machine that comprises a variable display device for variably displaying symbols (mechanical reels, items 64, 66, 68 of fig. 2) and an electrical display device with a variable display device (item 20 of fig. 1) which allows the display to be observed from outside the gaming machine (item 54 of fig. 1) using a rear support for the display (col. 3, line 10). Weiss's gaming machine also comprises of having one or more windows allowing the designs variably displayed in order to expose the light of the display (col. 2, lines 9-13). However, Weiss's gaming machine does not discuss if the electric display panel is located in front of the variable display device. In a similar gaming patent, Loose teaches the implementation of electric display device in front of a variable display device. He also

Art Unit: 3714

teaches the use of a trans- missive video display, which allows the user to view the video image without interfering with display device behind it (par. [0020]). Therefore it would have been obvious to one of ordinary skill in the art at the time of invention was made to combine the teachings of Loose and the gaming machine of Weiss in order to create a gaming machine that included a variable display device and an electric display with one another.

Regarding claim 2, Weiss teaches a game machine wherein the variable display device is one or more rotatable reels each having a reel band, on which said designs are drawn (items 64,66,68 of fig. 2).

Regarding claim 3, Weiss teaches a game machine that is a slot machine (fig. 1).

Response to Arguments

Applicant's arguments, filed on 6/20/07, with respect to the double patenting rejection regarding claims 1 - 3 have been fully considered and are persuasive. The double patenting rejection of claims 1 - 3 have been withdrawn.

Applicant's arguments filed on 6/20/07 have been fully considered but they are not persuasive. The Applicant argues "the applied art, alone or in combination, teaches or suggests a rear holder that the peripheral corner portions in the rear side of the windows are removed therefrom." The examiner does agree that the references does not teach or suggest a rear holder that the peripheral corner portions in the rear side of the windows are removed, however, in light of the applicant's disclosure, it seems that this limitation as claimed does not provide any advantage used for a particular purpose

Art Unit: 3714

or solves a problem. Therefore, the examiner holds this limitation as a mere design choice well within the skill set of an ordinary skill artisan.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
